

SILICONE REUSABLE ANESTHESIA BRETHING HOSE

WITH CONNECTOR

Corrugated silicone hose is a type of flexible tubing made from silicone material that has a Corrugated or ribbed surface. The corrugations are designed to provide flexibility and allow The hose to bend and twist easily, making it ideal for use in applications where a high degree Of flexibility is required.

WITHOUT CONNECTOR

Silicone Breathing Circuit

SIZE	Adult	Pediatric	Neonate
	(Tube ID22 mm)	(Tube ID15 mm)	(Tube ID10 mm)
Length	1200 MM	1200 MM	1200 MM
	1600 MM	1600 MM	1600 MM
	1800 MM	1800 MM	1800 MM
Continuous length	25 METER	35 METER	50 METER

Application:-

- The medical Anesthesia Breathing Circuit, respirator, breathing machine, medical equipment connector

KeyFeatures:

- Made of high-quality imported silicone rubber with the method of platinum catalytic technology.
- Patent technology of integrated molding, high strength, not prone to falling off and being separated, Good flexibility.
- It can endure high temperature and high pressure disinfection, reusable.
- Applicable to all kinds of imported and domestic breathing machine, anesthesia machine,
- Length can be customized
- Mainly used for operation patients in anesthesia and lack of oxygen, patients after recovery, Patients with severe postoperative respiratory support and care.
- Many Specifications for adult, children and newborn
- FDA, ISO certification
- Can be sterilized by autoclave EO gas (up to 136°C)
- Length can be customized, OEM is available.
- Kinking resistant tube to avoid blocking
- Match all kinds of anesthesia machine
- Tubing is 100% leak inspected at production
